

The global standings are unofficial due to the following reasons:

- Problem E had issues with the test cases. Solutions that could be accepted during the contest might were judged as wrong.
- The problem statement for Problem H was incorrect and was only corrected in the middle of the contest.
- Submissions in Java were judged incorrectly during the contest and were rejudged correctly at the end of the contest.
- No change in qualifying teams or medals was noted with either considered approach for the above.

We are sorry for all the above.
